

***FOR IMMEDIATE RELEASE***

**\*\* MEDIA ALERT \*\***

## **CALMAC TO ADDRESS NATIONAL ASSOCIATION FOR SUSTAINABLE EDUCATIONAL FACILITIES**

*Green building experts to share best practices to reduce campus cooling costs*

**WHAT:** Terry Andrews of [CALMAC](#) will join co-presenters George Fecik, executive director of facilities management at Duquesne University and Bill Harris, vice president of education markets for Trane, to address the Association for the Advancement of Sustainability in Higher Education (AASHE) at its annual conference, sharing case studies and best practices to help education facilities increase sustainability while reducing operating costs.

CALMAC's [IceBank](#)<sup>®</sup> thermal energy storage system greatly reduced Duquesne University's cooling costs by taking advantage of off-peak electric rates and Andrews will share important strategies for schools and universities to use thermal energy storage to reduce energy demand.

**WHO:**

- \* Terry Andrews, western regional sales manager, LEED AP, CALMAC
- \* George Fecik, executive director of facilities management, Duquesne University
- \* Bill Harris, vice president of education markets, Trane

**WHEN:** Tuesday, October 12 at 12:10 p.m.

**WHERE:** Energy Storage Can Benefit Your Campus, Finances and Community!  
AASHE Annual Conference, room 303  
Colorado Convention Center  
700 14th Street  
Denver, CO 80202

### **About CALMAC**

[CALMAC](#) Corporation is widely recognized for promoting peak energy conservation and energy cost savings. A member of Demand Response Smart Grid ([DRSG](#)) Coalition and a [USGBC](#) member, CALMAC is the manufacturer of IceBank<sup>®</sup> Energy Storage equipment with over 3,600 Ice Storage installations worldwide. IceBank systems are a

valuable component of the smart grid, enabling energy, including renewable wind energy that mainly blows at night, to be efficiently stored for use during periods of high demand.
